Prawn is a pure Ruby PDF generation library that provides a lot of great functionality while trying to remain simple and reasonably performant. Here are some of the important features we provide:

Vector drawing support, including lines, polygons, curves, ellipses, etc.

Extensive text rendering support, including flowing text and limited inline formatting options.

Support for both PDF builtin fonts as well as embedded TrueType fonts

A variety of low level tools for basic layout needs, including a simple grid system

PNG and JPG image embedding, with flexible scaling options
